FIG. 5

FIG. 6

FIG. 7 is a schematic diagram of a system 600 for processing a set of data 606. The system 600 includes a processor 612 and a memory 620. The processor 612 is configured to process the data 606 and generate a result 630. The memory 620 is configured to store the data 606 and the result 630. The system 600 is further configured to output the result 630.
